**Einhell**  
WELL DONE.

Our Philosophy

# Products. Well done.

We have grouped our 50 years of experience in developing and manufacturing high-performance equipment into two basic product lines.

All the Red products represent our accumulated skills in product design and development. This is where exclusive, ergonomic design combines with practical functions, premium craftsmanship and good service for improved performance and better quality to meet the most demanding customer requirements.

The Blue line represents our entry-level products, which are characterized by their optimized utility at closely calculated prices. All our products provide performance that makes do-it-yourself projects fun as well as combine high functionality with safety and ease of use. Performance and quality are well balanced and offered at prices that put a smile on everyone's face.

Einhell. Well done.

International

# Einhell. Well done.

The Einhell group employs over 1400 people in more than 50 countries around the world. With an annual sales volume that exceeds 10 million electric tools and machines, we are one of the most capable trade partners on a domestic as well as international level.

Our strength in the market allows us to achieve outstanding value with each of our products, which are tested by experts on site to ensure quality and safety. In addition, our development work in Germany is subjected to a thorough testing and inspection program. We demonstrate our high performance standards continuously in the form of practiceproven, sophisticated brand products.

Einhell. Well done.

**Jan Teichert**  
Chief Financial Officer

**Dr. Markus Thannhuber**  
Chief Technical Officer

**Andreas Kroiss**
